Full-stack Engineer and System Architect with an analytical background in the physical sciences. Specialized in building scalable, data-aware applications that integrate AI and real-time automation to solve operational bottlenecks and deliver measurable business ROI.

PROFESSIONAL EXPERIENCE

Full-Stack & AI Systems Engineer (Freelance)

04/2023 – Present

- Architect and deliver end-to-end web applications for SMEs, streamlining operations through intelligent UI/UX.
- Develop RAG-based AI automations that integrate directly with business data to eliminate manual administrative bottlenecks.

FEATURED PROJECTS

Aligned Surveyors ERP & CRM

06/2026

<https://alignedsurveyors.co.zw>

- Engineered a full-stack Laravel/React ecosystem featuring real-time collaborative chat (WebSockets) and secure P2P video conferencing (WebRTC).
- Implemented database-aware AI analytics to provide project insights without requiring full page reloads.

Zamsam Engineering Platform

08/2025 – 09/2025

<https://zamsam.org>

- Engineered a high-conversion Next.js platform integrating a Chatbase GPT-powered assistant to qualify leads.
- Implemented automated WhatsApp click-to-chat pipelines to seamlessly route high-intent clients for appointments.

Summit Guesthouse Platform

06/2024 – 08/2024

<https://summitguesthouse.org>

- Digital transformation project replacing manual bookings with a 24/7 automated storefront and inquiry pipeline.

Dev Portfolio (SaaS-Style)

08/2023 – Present

<https://michaelmwanza.site>

- Custom-built CMS featuring dynamic project/skill CRUD operations and an interactive Grok-powered RAG chatbot for technical portfolio engagement.

Handcrafted Haven (Marketplace)

<https://handcrafted-haven-pied.vercel.app>

- Developed a decoupled e-commerce marketplace using Next.js, Prisma, and PostgreSQL with robust AI-driven inventory recommendation guardrails.

TECHNICAL SKILLS

Core: Full-Stack Development, System Architecture, RESTful APIs, PHP, Laravel, React, Next.js.

AI/Automation: RAG Pipelines, Workflow Automation, Gemini, Grok API Integration.

DevOps: Docker, CI/CD, Linux (Ubuntu), Nginx, VPS, AWS, Render.

Version Control: Git, GitHub Actions.

EDUCATION

BSc Software Development

BYU-Idaho (Expected 2026)

Associate Degree: Software Dev

BYU-Idaho (Completed 2025)

Backend Certifications

ALX Africa (2024–2025)

LANGUAGES

English (Native), Shona (Native)

ADDITIONAL

Member, The Room Africa.

Interests: Automation, Technical Research, Problem-Solving.
